

190T Polyester Taffeta Fabric With Pvc Pu Coating is a type of polyester thin fabric, mainly made of polyester or imitation silk. It is woven from polyester filament, with a shiny appearance and a smooth and delicate touch. After post-treatment such as dyeing, printing, embossing, and coating, the texture is smooth, non stick to the hand, elastic, shiny and dazzling, and the colors are bright and eye-catching. When igniting fibers, there will be other odors. Usually used as fabric and lining, currently mainly used as lining. Widely used in making luggage and leather goods, packaging bags, luggage linings, hat linings, etc. As a high-performance material, it is also used in outdoor equipment, travel goods, industrial products and other fields, such as canopy tents, sunshades, etc. Compared to 210D Oxford fabric, 190T polyester taffeta has a softer and smoother feel, but is relatively lighter and thinner. Oxford fabric itself is thicker and more durable than polyester taffeta.

Key attributes

Supply Type:	Make-to-Order
Material:	100% Polyester
Thickness:	Medium Weight
Feature:	Memory, Waterproof, Flame Retardant, Anti-Static, Tear-Resistant, Blackout, Stretch
Technics:	woven
Type:	Taffeta Fabric
Width:	58/60"
